TECHNICAL SKILLS

Backend

PHP · Symfony · Yii2 · Python · FastAPI · Node.js · REST APIs · Microservices

Frontend

Vue.js · Next.js · JavaScript · HTML5 · CSS · Mapbox · MapLibre

AI / ML

Machine Learning · NLP · Computer Vision · scikit-learn · pandas · NumPy · MLOps · N8N · Flowise

Data & Search

Elasticsearch · PostgreSQL · MariaDB · SQL · Geospatial · MBTiles

DevOps & Tools

Docker · GitLab CI/CD · Git · Linux · Bash

Practices

TDD · OAuth2 · JWT · Scrum · CRISP-DM · OWASP

LANGUAGES

Spanish	Native
Catalan	Native
English	B2
French	A2

CERTIFICATIONS

- IBM – Data Analysis Using Python
- Big School – Development with AI
- Microsoft – Intro to AI Concepts

Full-stack engineer with 2 years of production experience — backend-heavy, with strong Vue.js skills and real ownership across the entire stack. Built geospatial systems, inventory sync pipelines, and campaign automation at EXTE. Currently specializing in **Machine Learning** through an MSc in AI at UNIR, with coursework in supervised & unsupervised learning, NLP, Computer Vision, and MLOps. Seeking a role where engineering rigour meets applied AI.

WORK EXPERIENCE

Backend Engineer (Full-Stack) · EXTE

Sept 2024 – Present

- Built inventory sync pipelines integrating external DOOH platforms (Broadsign, VIOOH, Hivestack) via REST APIs, keeping screen and availability data consistent in real time.
- Engineered a campaign planning microservice with agency-specific business rules and geospatial proximity calculations (POI + screen radius) — cutting planning time **from several days to minutes** and eliminating manual coordination bottlenecks.
- Developed full-stack dashboards (Vue.js + Elasticsearch) with an integrated map layer (MBTiles + Martin tile server + Mapbox/MapLibre) for real-time inventory visualization, used by agency clients and internal teams.
- Contributed Vue.js components to the internal UI library, ensuring reusability and design consistency across products.
- Designed secure REST APIs (OAuth2, JWT, OWASP) and built CRUD services across monolithic and microservice architectures (Symfony, Yii2, MariaDB, Docker).
- Implemented GitLab CI/CD pipelines with automated testing and staged deployments, improving release stability.

Aluminum Carpenter · MAFAC Vallés, SLL

Jun 2020 – Sept 2023

- Hands-on environment that built strong teamwork, accountability, and work ethic applied to every engineering role since.

EDUCATION

MSc Artificial Intelligence

2026 – Present

International University of La Rioja (UNIR)

Machine Learning · NLP · Computer Vision · MLOps · Generative AI · AI Project Management

BSc Computer Engineering

2021 – 2025

Autonomous University of Barcelona (UAB)

Specialization in Information Technology

Technological Baccalaureate

2019 – 2021

Joan Oliver Institute
